

WDD 130 Website Proposal

Columbus Ohio Temple Re-Dedication Informational Website

Purpose: The purpose of my website would be to provide information about the newly renovated and soon re-dedicated Columbus, Ohio LDS Temple. This site would be simple yet engaging as it provides basic information about temples of the Church of Jesus Christ of Latter-Day Saints along with explanations on why it was recently renovated, its open-house, and information on its re-dedication ceremony in June of 2023.

Audience: The intended audience would be non-members, specifically those living near or around the area of the temple, who are curious of the construction, open-house, and re-dedication traffic and events that have occurred near them. Simply, for people who want to know more about that beautiful building and what its purpose is.

Content: This website would include the following:

1. Home page – beautiful picture of the newly renovated temple and a quote on temples from a church leader, along with a navigation bar to the included pages and a contact form to submit to learn more about the church.
2. A child page that would include the purpose of temples and what they mean to latter-day saints and a history of the Columbus, Ohio Temple.
3. A child page explaining the purpose of the renovation of the temple, photos, and timeline of its process.
4. A child page on the Open House, images of the inside of the renovated temple and explanation of why the church opens the temples to the public.
5. A child page on the re-dedication and information, possible images, and quotes on temples from church leaders.
6. A child page for contacting the missionaries or temple presidency with questions.
